## SUMMARY

Results-oriented Full Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express, React/Angular, and Node.js. I am currently completing a Diploma in Full Stack Development. Skilled in applying problem-solving skills, workflow optimization, and coordinating development processes learned through prior e-commerce roles.

## SKILLS

**Front-End:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Angular

**Back-End:** Node.js, Express.js

**Databases:** MongoDB, Firebase

**Tools & Platforms:** Git, Visual Studio Code, Postman, Docker

## PROJECTS

**LinguaLog** – Language Learning Support App (Personal Project)

*Technologies:* Angular, MongoDB, Node.js, Express, Angular Material

- Implemented full CRUD functionality for vocabulary and note management.
- Designed multiple quiz modes including random, user-selected, and spaced repetition logic.
- Users can select elements to suit their needs, such as titles, paragraphs, lists, tables, and images.

**LifeBuddy** – Schedule Planner App (Personal Project)

*Technologies:* React, MongoDB, Node.js, Express, Material UI

- Implemented full CRUD functionality for tasks, diaries, and calendar events management.
- Integrated FullCalendar to manage and visualize schedules and events.
- Designed REST APIs based on OpenAPI specifications to improve development workflow.

**FlatFinder** – Rental Property Search App (Team Project)

*Technologies:* Angular, MongoDB, Node.js, Express

- Designed and built a full-stack rental property search app in a two-person team.
- Implemented responsive UI, filtering features, and database integration.
- Focused on collaboration using GitHub and clean code organization.

**Letter Guessing Game**

*Technologies:* React, JavaScript

- Built a component-based interactive quiz game for practicing React fundamentals.

## EDUCATION

---

**Greystone College** - Vancouver, BC | 2024-Present

Diploma in Full Stack Development

- Implemented various web projects, including FlatFinder, a responsive building search application built with Angular and MongoDB.

**Musashino University** – Tokyo, Japan | 2016 – 2020

Bachelor of Human Science

- Awarded for academic excellence with a ¥100,000 scholarship prize.

## FreeCodeCamp Certificates

- Completed “Responsive Web Design” and “JavaScript Algorithms & Data Structures”.

## WORK EXPERIENCE

---

**Miku Vancouver** - Vancouver, BC

*Dishwasher / Kitchen Support / Aug 2025 – Present*

- Maintained cleanliness and organization of kitchen operations in a fast-paced restaurant environment.
- Assisted team members with food preparation and workflow efficiency.
- Developed strong time management and teamwork skills in a multicultural workplace.

**Alfresa Medical Service Co.** - Tokyo, Japan

*E-commerce Operations Coordinator / Apr 2022 – Oct 2023*

- Managed product data, pricing, and inventory on an e-commerce platform, ensuring accuracy and operational efficiency.
- Created a no-code application to streamline pricing management, improving workflow efficiency.
- Coordinated with developers to implement new product pages, gaining experience in project request and development processes.
- Handled customer inquiries via phone and email, enhancing customer satisfaction.

*Site Manager / Apr 2021 – Mar 2022*

- Supervised hospital logistics operations, coordinating inventory, deliveries, and staff.
- Built strong relationships with clients and hospital staff, ensuring seamless daily operations.
- Developed problem-solving and leadership skills transferable to tech team collaboration.

*Sales / Apr 2020 – Mar 2021*

- Sold and delivered medical products to hospitals and clinics.
- Provided detailed product information and training to clients, ensuring proper handling.
- Gained experience in client communication and workflow optimization.
